Volume XI: 1764. Cover, 1 table sheet, 450 pages, 1 sheet, 43 plates. "Quadrupeds VII".

Volume XII: 1764. Cover, 2 table sheets, XVI pages, 451 pages, 58 plates (plate no. XXVI incorrectly placed). "Quadrupeds VIII"

Volume XIII: 1765. Cover, 2 table sheets, XX pages, 441 pages, 1 sheet, 59 plates. "Quadrupeds IX".

Volume XIV: 1766. Cover, 2 table sheets, 411 pages, 41 plates. "Quadrupeds X".

Volume XV: 1767. Cover, 2 table sheets, 207 pages, 18 plates, CCCXXIV pages ("Concordance et table alphabétique des noms pour les animaux quadrupèdes"). "Quadrupeds XI".

Conservation: Very good condition. Completely reviewed. In general, very clean paper and engravings with wide margins. Volume X with the slightly different binding.

Notes: This encyclopedia includes all the knowledge of the time concerning the "natural sciences", a broad term, also grouping together scientific disciplines on materials, physics, chemistry or technology. The attention that Georges Louis Leclerc gives to internal anatomy places him among the precursors of comparative anatomy: "L'intérieur, dans les êtres vivants, est le fond du dessin de la nature" (the interior, in living beings, is the basis of nature's design), he writes in Quadrupèdes. The 580 magnificent intaglio engravings that comprise these 15 volumes were made by Jacques de Sève regarding quadrupeds.

Other information: Beautiful Ex libris of the Duke of Híjar and at the bottom of the spine gilt iron with the surname "Ulloa".
